

## Purso-Riikku Terrace Glazing System

With the Purso-Riikku Terrace Glazing System you can create comfortable and sheltered extra space on your terrace. You are protected from the rain and wind and can enjoy your terrace despite the weather or the time of year.

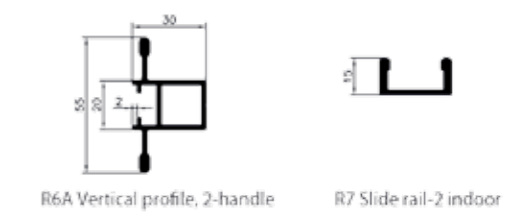

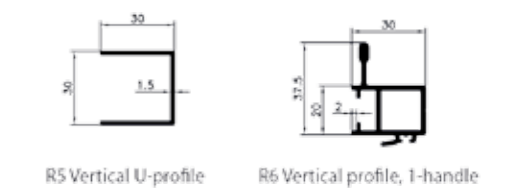

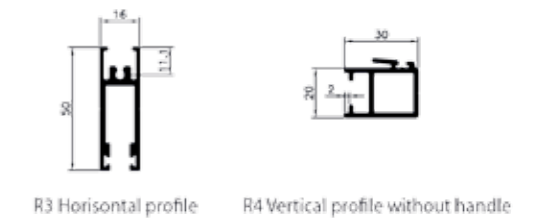

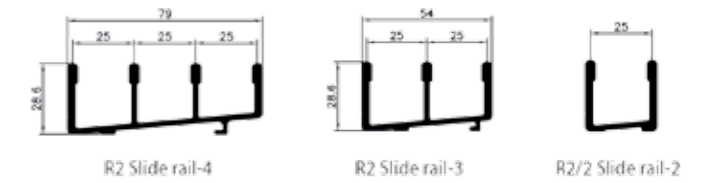

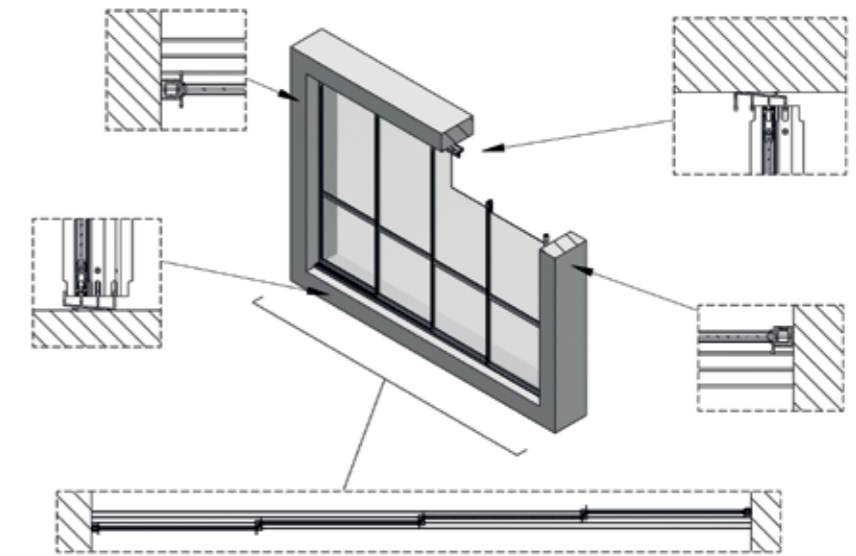

- **Designed** from durable materials.
- **Easy and safe** to use all around the year.
- The use of several different **locking systems** is possible.
- Consists of horizontal slide rails and **sliding** glass elements.
- Slide rail profiles are **installed** into floor and ceiling structures. Slide rails are inclined outwards, which means that water will drain away from water holes.
- The frames of the glass elements are **durable aluminum**. Brush seals between glass elements keep joints tight.

Slide rail profiles are available with 2 or 4 rails. The indoor model of the slide rail profiles includes 2 rails without drainage holes. The indoor model is also lower.

Maximum dimensions of a glass element (width x height):

- 4 mm glass: 1000 mm x 2500 mm
- 6 mm glass: 1200 mm x 3500 mm

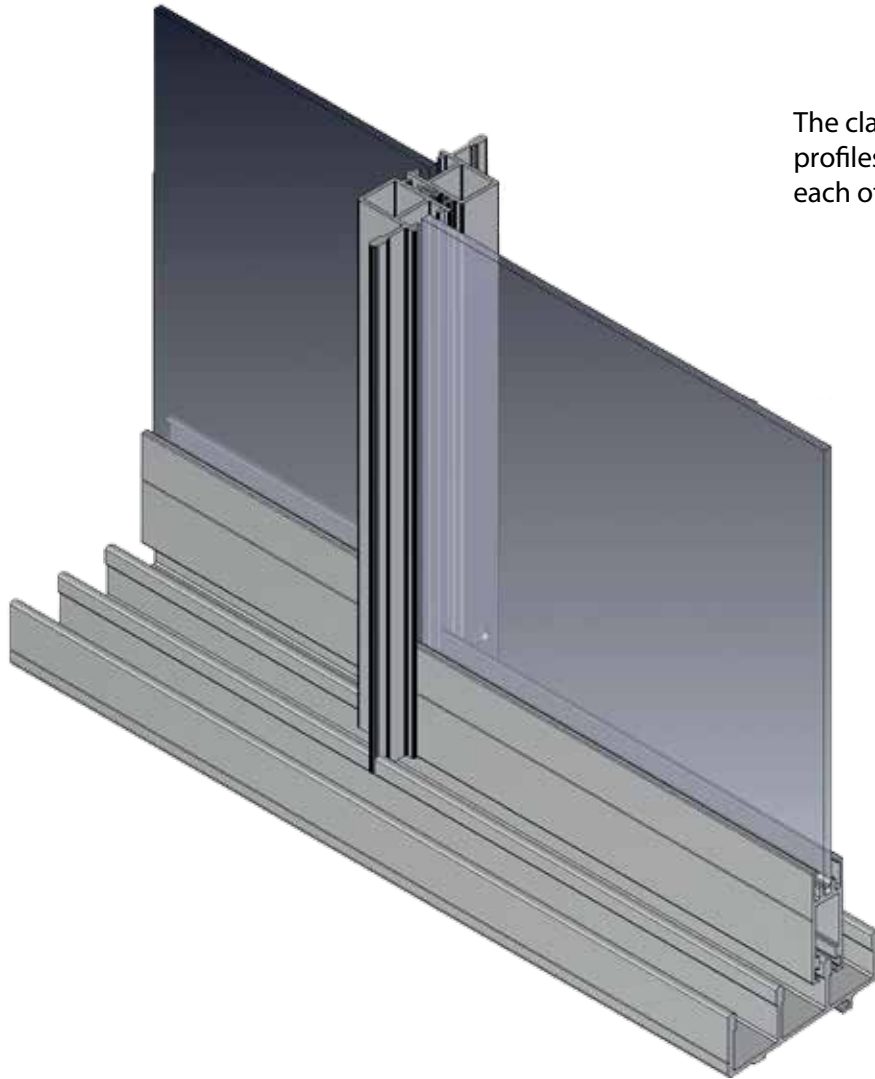

**Purso-Riikku Terrace Glazing System**

Year-round sheltered porch

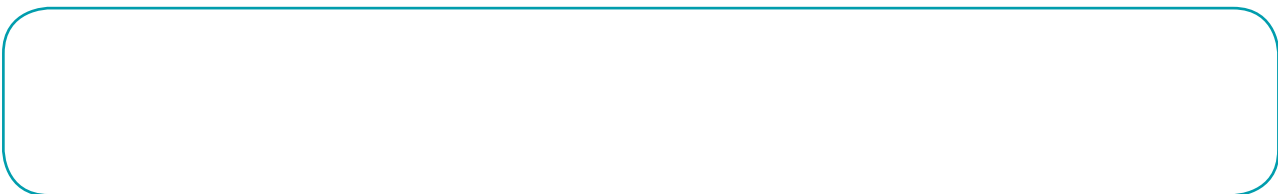

Timeless design

Smart, integrated terrace

The clasp technique used with vertical profiles connects glass elements to each other.
